## Menu of Core Activities

### OUTCOME BUNDLE

**ADDRESSING:**

- [ ] Access to Primary Care Services
  - Increasing in utilization of mobile clinics
  - Increasing in capacity and access to services by utilizing Community Health Workers (CHWs)/promotoras, health coaches, peer specialists and other alternative clinical staff working in primary care
  - Expanding Practice Access (e.g., increased hours, telemedicine, etc.)
  - Establishing care coordination and active referral management that integrates information from referrals into the plan of care
  - Providing screening and follow up services
  - Providing vaccinations to target population
  - Integrating physical and behavioral health care services
  - Using telemedicine/telehealth to deliver specialty services
  - Providing services to individuals that address social determinants of health.
  - Other

- [ ] Access to Specialty Care Services
  - Improving access to specialty care services with the concentration on underserved areas, so providers can continue to increase access to specialty care in the areas with limited access to services.
  - Using telemedicine/telehealth to deliver specialty services.
  - Implementing remote patient monitoring programs for diagnosis and/or management of care.
  - Providing services to individuals that address social determinants of health.
  - Other

- [ ] Expansion or Enhancement of Oral Health Services
  - Utilizing targeted dental intervention for vulnerable and underserved population in alternate setting (e.g., mobile clinics, teledentistry, FQHC, etc.)
  - Expanding the use of existing dental clinics for underserved population
  - Expanding school based sealant and/or fluoride varnish initiatives to otherwise unserved school-aged children by enhancing dental workforce capacity through partnerships with dental and dental hygiene schools, local health departments (LHDs), federally qualified health centers (FQHCs), and/or local dental providers.
  - Other
